

POLARIZED AIR CLEANER

PLATINUM IAQ POLARIZED AIR CLEANER

TARGET PARTICULATES

COARSE PARTICLES (<10 microns)

- Bacteria • Dust & Dirt • Dust Mites
- Mold Spores • Pet Dander • Pollen

FINE PARTICLES (<2.5 microns)

- Atmospheric Dust • Pet Allergens
- Smog • Soot • Smoke • Viruses

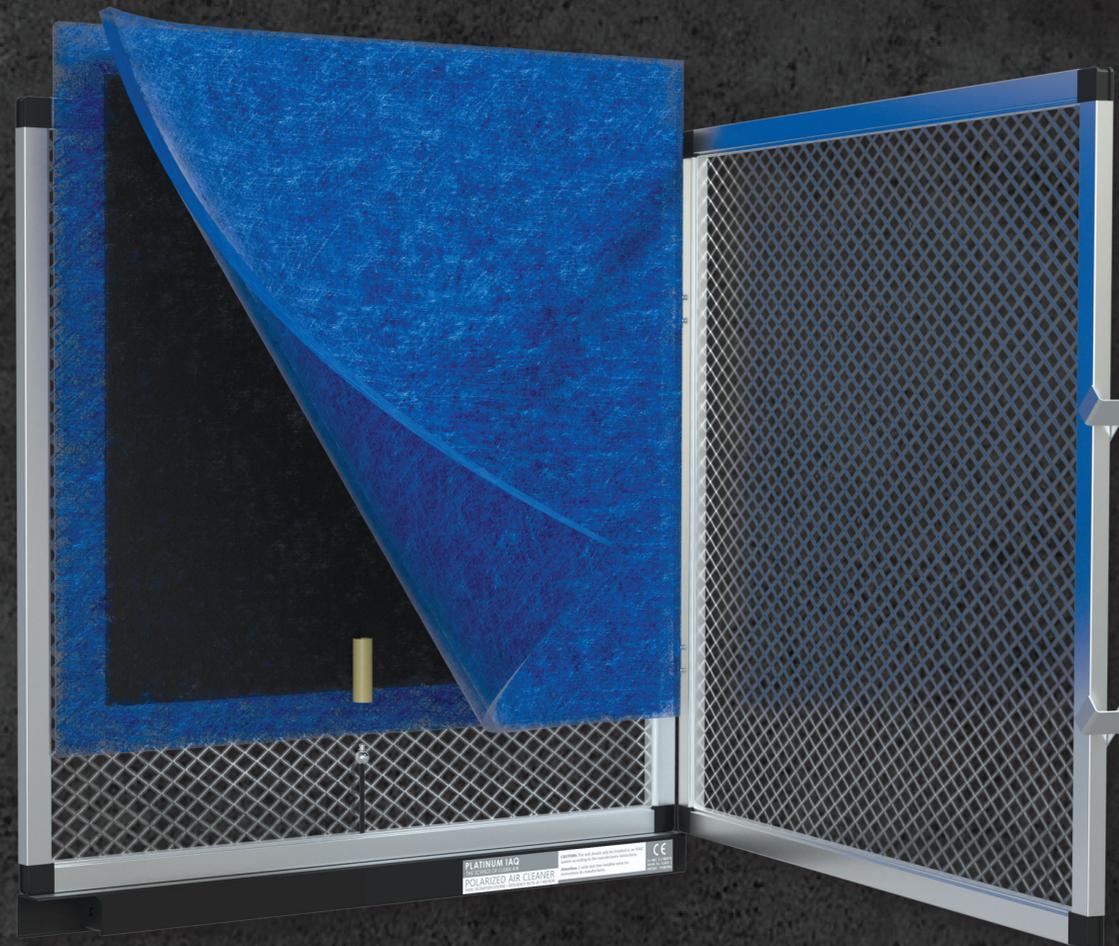

PAC fits most HVAC systems

PLATINUM PAC

The Polarized Air Cleaner (PAC) creates a polarized charge which attracts the smallest contaminants to each other and to the polarized media. Most HVAC filters only capture large particles but fine particulates are a serious health risk.

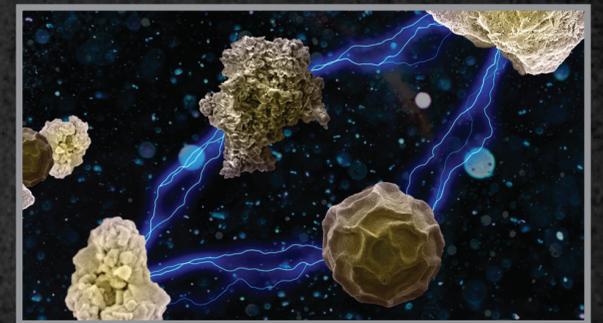

Because the PAC is less restrictive, the air system can work at peak efficiency. The result is exceptional sub-micron particulate removal without the efficiency robbing static-pressure common with traditional filters.

- 97% effective at .3 microns (.00001 inch)
- Antimicrobial nanotechnology
- Helps to reduce odors and VOCs
- UV-reactive filter media
- Fits standard 1" filter slot
- Low-cost media replacement (4-6 months)
- Lifetime system warranty

SPECIFICATIONS

PERFORMANCE	97% @ 0.3 micron
PRESSURE DROP	0.12" @ 300 FPM
DIMENSIONS	<3/8" of filter size x 1" deep
ELECTRICAL	24VAC, 0.07amps, 1.5VA, 50/60 Hz
WARRANTY	Lifetime all parts except media
PART#	AD-PAC-XXYY
MEDIA	TUV-PLPM-1-XXYY

Polarized charge attracts particles making them easy to capture

Antimicrobial nanotechnology coating destroys microbes on contact

Made in USA
